17 November 2023

How WGs Address the Core Commitments of the ARRA

1. **Recognise the diversity of contributions** to, and careers in, research, in accordance with the needs and the nature of the research.
2. **Base research assessment primarily on qualitative evaluation for which peer-review is central**, supported by responsible use of quantitative indicators.
3. **Abandon the inappropriate uses in research assessment of journal- and publication-based metrics**, in particular the inappropriate uses of journal impact factor (JIF) and h-index.
4. **Avoid the use of rankings of research organisations** in research assessment.

WGs Play a Key Role in the Implementation of CoARA

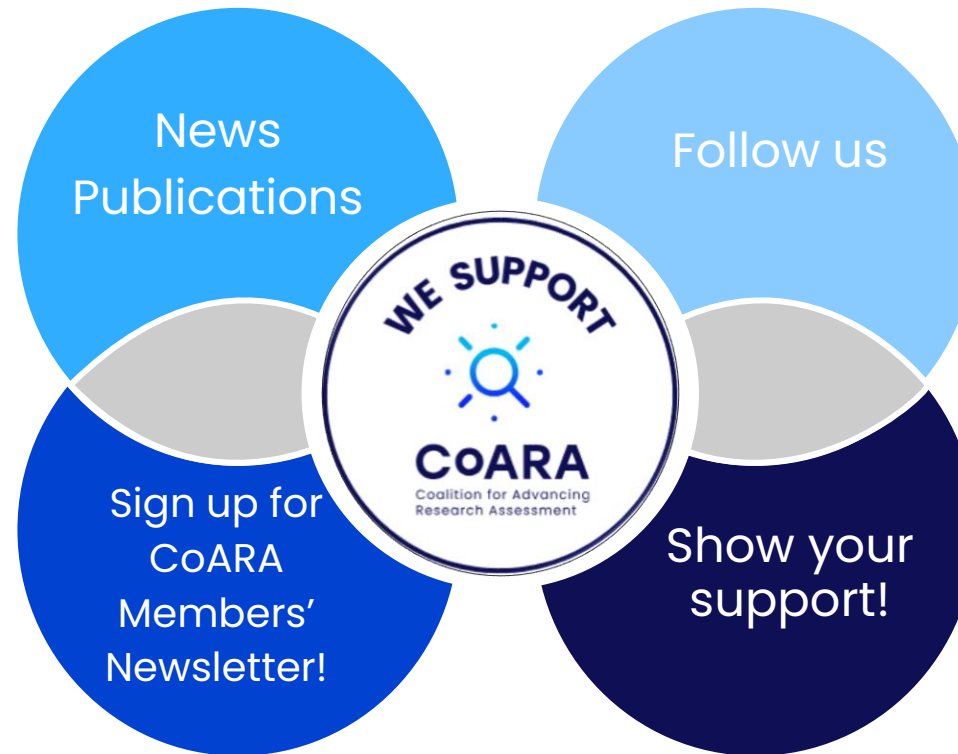

- WGs develop outputs to advance research assessment and support the implementation of members' commitments
- Defining joint pilots and initiatives as appropriate;
- Exchanging information on the impacts – benefits and costs – of the changes implemented for further evidence-informed changes
- **Unique opportunities to develop consensus around topics and outputs within and beyond the critical mass of CoARA membership**
